

GRAY INFIELD WILL PROVE FASTEST IN VALENTINE STATE

Such Is Conclusion of Close Observers After Watching Performance of Manager McNelly's New Acquisitions.

Manager McNelly is determined to show the Warren District fans some real baseball and in the execution of this purpose has already taken some steps which should bring big results in the matter of winning games. Hereafter the Bisbee fans may expect from the C. & A. team fully as fast an article of ball as has been offered the diamond devotees of the Rio Grande League. This statement is not merely an enthusiastic declaration, induced by a super-attack of diamonds, but is a cold, methodical deduction of facts.

It did not take an expert judge of baseball timber at Sunday afternoon game between the Grays and Tucson, to recognize in Fuller, a catcher of exceptional ability. The way this big fellow kept his pitcher working right up to form was a pleasing sight to close observers of the finer points of the game. Fuller has a nice wing, too, and watches the bases after the manner of a true defensive diamond general. His record at the wheel, in Sunday's game, was a triple and single in four times at bat. Fuller is a husky fellow and should make good, later on, in the more select circles of ballroom. His failure to attain success in the Rio Grande circuit, where he performed with the Tucson outfit, may be attributed to illness which kept him out of the game for a long period. Fuller will perform regularly behind the bat for the Grays.

Captain Anheuser will hereafter cover the first corner, his regular position. Being a tall, rangy athlete, the big fellow should be splendidly adapted to covering this extremely difficult position.

The combination of Fuller behind the plate and Anheuser on first should prove an extremely valuable defensive factor. Both players are unusually heavy and quick, accurate throwers. This combine seems destined to prove a safety lock against base-runners.

Galt, the full-blooded Italian pitcher, comes here with splendid recommendations and it is safe to say that his effort during the closing innings of Sunday's game was no criterion on his true ability. Coming to the mound with his team enjoying a comfortable lead, Galt probably did not wish to pull himself together until he found himself facing a real crisis in the ninth. Manager McNelly and others who have watched him closely declare that he will make good with a vengeance. When not on the mound, Galt will be used in the outfield.

Legge, the former catcher is back from a trip to the coast. He will be used on the hot corner and this assignment should complete an infield which will yield to none in the entire state of Arizona, not excluding Rio Grande circles.

RETURN TO PHOENIX.

After spending the day in the District looking after his interests in the Higgins Leasing company Ned Creighton, a prominent Phoenix newspaperman, returned to the capital city last evening. W. J. Graham, who paid a flying visit in Lowell and Bisbee, during the recess of the legislature, returned with Creighton last evening.

MARRIED THIS MORNING.

This morning Miss Lillie Johnson, the accomplished daughter of Peter Johnson and Mrs. Johnson, will be married to Ross Connelley, of Douglas. After the ceremony, it is understood, the couple will go to El Paso and other points on a wedding trip. The bride was raised in Bisbee and has a host of friends here, while the groom has lived here and is a frequent visitor to Bisbee from his headquarters in Douglas.

BUMPER CROPS EAST BUT PREFERS THIS STATE ABOVE OTHERS

George Wall, Formerly a Resident of Bisbee, Returns Here to Make His Home; Tells of Conditions Farther East.

After spending about eight months in the town of Amarillo, Texas, and some time in other parts of Kansas, Oklahoma and Texas, George Wall, formerly a resident of Bisbee during part of which time he was engaged in the milk business, has returned and will re-locate here.

According to Wall, who was recently through the wheat belt of Kansas, the farmers are contracting their wheat for \$1.25 per bushel. Other parts of this section, declares the Bisbee man, are in an equally flourishing condition.

The parts of Oklahoma, not hit by the recent floods, are also showing bumper crops, but those sections torn up by the heavy waters are in a deplorable state.

Wall tells of a slight out on the Little Wichita. The water was so high that a horse coming down the stream, on the crest of the flood, became entangled in the iron work of a railroad bridge and when the water subsided the horse was left hanging high in the air with his neck imprisoned in the bridge. This and other sights, according to Wall induced him to return to Bisbee which looks better than ever to him.

OFFERS CHANCES FOR AMBITIOUS PUPILS TO ATTEND COLLEGE

Annual Examination for County Scholarship at University of Arizona Occurs June 26; Competition in Five Studies.

Of interest to every student in the district, contemplating the pursuit of a higher education, should be the announcement concerning the annual examination for the Cochise County Scholarship at the University of Arizona, which has just been issued by Miss Minnie Lutz, County Superintendent of Schools. The winner in this competition will be awarded the sum of \$250 to be used by the holder for tuition, room and board in the University during the academic year following the award. The examination will be given at the city of Tucson and the largest number of applicants will be given at the city of Tucson. Applications should be sent to the County Superintendent not later than June 4, and the examination will occur Saturday, June 26.

Educational authorities of Cochise county, as well as others having the welfare of the young people at heart, would be pleased to see a wider interest in this competition than was evinced last year when only two applicants appeared for examination. It is felt that at least 25 candidates should be ready and anxious to make an attempt for this substantial prize.

The University requires that candidates for county scholarships be examined in but five studies: English, Algebra, and Science (Agriculture, Botany, Zoology or Chemistry), and two subjects selected from the following: History, Latin, French, German, Spanish, Plane, Geometry and a second Science.

DEATHS FROM AIR RAIDS.

LONDON, (Tuesday) June 1.—The Morning Post's Stockholm correspondent says: "Forty passengers lost their lives in a fire which destroyed the steamer Bore, at Helsinki." The dispatch apparently refers to a Zeppelin raid of the Finnish capital.

The morning newspapers in their early editions confine themselves to brief official statements regarding the Zeppelin activity in outlying districts of London, although they naturally give the statements the most prominent space. The Morning Post gives a recapitulation of Zeppelin activity in England for the past few months, calling attention to the fact that the raiders have been gradually getting closer and closer to London, until a week ago there was an aerial visitor at South End. The newspaper adds that there was a report that this airship reached as near London as Romford, which is twelve miles northeast.

A prior statement from the official press bureau was issued in a note reminding newspapers that no statement should be published dealing with places in the neighborhood of London reached by air craft or the course supposed to be taken.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, it swells and shuts off the passage of air into the middle ear. This condition is known as "catarrh of the Eustachian Tube." It is the only cause of deafness, and it can be cured by the use of the "Baker's Ear Cure." This cure is a simple, natural, and safe method of treating the inflammation of the Eustachian Tube. It is the only cure that can be used without the use of any medicine. It is the only cure that can be used without the use of any medicine. It is the only cure that can be used without the use of any medicine.

STATE BRIEFS

Mesa has set the pace by pulling off a jittery dance.

The Mormons of Miami are to build a meeting house soon.

A large new school house is to be erected at Hayden.

Duncan in Graham county, is to have an 8-week term of summer school.

Mesa is again talking about building a big tourist hotel during the fall.

In the school bond election at Holbrook, there was not an opposing vote cast.

The steel for the new bridge to be erected in the vicinity of Holbrook was unloaded last week.

Morone water rates have been materially reduced by orders issued by the corporation commission.

Cocconino County has placed an order for a number of automobiles for the use of its county officers.

The home of a Tucson merchant was raided and 1000 bottles of wine seized by the county officers.

Work has been started on the new building to be used as a home for the Arizona National Bank in Tucson.

Globe Elks are arranging a fine program for the regular Pic Day celebration on June 14.

John Faugh, one of the City Dads of Globe, is soon to put a forty-passenger boat on the Roosevelt Lake.

Yuma has arranged so that its citizens may take a peep at the Liberty Bell when it is en route to El Paso.

Flax, five applicants are a drag on the market in Yuma and are being sold at ridiculously low prices.

Fireproof is insisting on closing street lights since their contract with the lighting company has expired.

Globe and Miami are arranging to send a display and a delegation to the business men's Exposition in Chicago in June.

While operating a hay labor on a ranch near Safford last week, Earl Opler, a lad of 14 years, had his right arm torn off.

Julius Cooper holds that officers have no right to hold fingers seized on search warrant if not cloth or embezzled.

Hundreds of acres are being set out to olives in the Casa Grande section. Water is obtained at an average depth of 67 feet.

A tool box, filled with whisky, was shipped into Miami. A broken bottle disclosed the nature of the contents. The owner cannot be located.

Over became so troublesome in the flower gardens of Williams that it became necessary to call on the city marshal to drive the animals into the forests.

Fifteen thousand acres of land in Yuma county have been withdrawn from entry under the provisions of the Carey Act. California will develop the land.

Yuma county's road fund, bonds have been successfully marketed and the officers of that county now have an even half million dollars in cash with which to build and improve roads.

The Bargain Counter of the Southwest

The classified columns of the Bisbee Daily Review contain daily more real bargains for the thrifty investor than can be found in any other medium. Read this page every day and you will surely find what you are looking for.

BY ELOPING THEY UPHELD TRADITION IN MAYOR'S FAMILY

Mr. and Mrs. Elmer Kiel, Elmer Kiel, the young son of Mayor Kiel of St. Louis, Mo., eloped to Chicago a few days ago with Miss Marie Biddle, also of St. Louis. This was the third elopement in the family of Mayor Kiel within the last few years.

Two Bisbee Elks Receive Election to Chief Executive Positions; Local Elksdom Gets Merited Honors.

Bisbee will hold the next reunion of Arizona Elks. This, with the election of two Bisbee Elks to the chief executive positions of the Reunion Association, were the most important matters to be decided upon at Tucson last week. Returning delegates from this city, report that they were hospitably entertained by their Tucson brothers with auto rides, a banquet, and an informal dance and that their visit to the Old Pueblo was highly enjoyable.

Thomas Blair of Bisbee 671, is the newly elected president of the Arizona Elks. P. O. Elks Reunion Association, and Joseph H. Gray, also of Bisbee 671, is the secretary. W. Gleason Nilsen, of Tucson, was honored by re-election as treasurer. The vice-presidents are Peter Riley of Clifton, G. D. Randolph, Flagstaff, and R. H. Knott of Yuma. The three members with the president, secretary and treasurer, will constitute the Executive Committee, will be announced by President Blair in due season as will the membership of the other standing committees. As to these, Blair states that it is his intention to consult the various lodges of the Association relative to appointments.

The session in Tucson last Friday was in the nature of a business meeting and not a convention. Originally it was planned to hold the reunion at there but the plan was abandoned by the Tucson lodge with the consent of the executive committee following the outbreak of the European war and owing to the fact that the Grand Lodge will be held so close to Arizona that interest in the reunion would be lessened. Despite this there were six of the eight lodges represented and about 20 delegates present in person, bearing proxies for the other delegates to which those lodges were entitled. At the reunion heretofore held in Phoenix, Tucson and Globe, there have been gathered 400 or 500 Elks and their wives, and when Bisbee entertains next April it is anticipated that all figures for attendance will be passed. There is certain to be a great outpouring of Elks for it has been the desire of the Association to make Bisbee a Mecca since the local lodge (444) started the association.

The invitation of Bisbee to hold the next reunion here was unanimously accepted by the delegates by an overwhelming vote. Phoenix has held two reunions, Tucson one, beside the meeting of last week and Globe one. Obviously they extend over from two to three days, two sessions being given over to business meetings and the balance of the time to social and festive events.

sell to this connection to point out that the Lusitania was one of the largest and fastest of British merchant ships built with government funds as an auxiliary cruiser, and carried, expressly as a steamship in the navy. It is further known in the Imperial government, from trustworthy reports, from agents and neutral passengers that for a considerable time past only all of the more valuable British merchantmen have been equipped with cannon, ammunition and other weapons, and manned by persons who have been especially trained in service guns. The Lusitania, too, according to information received here, had

cannon aboard which was mounted and concealed below decks.

"The Imperial government further has the honor to direct the particular attention of the American government to the fact that the British Admiralty in confidential instructions issued in February, 1915, recommends to its mercantile shipping not only to seek protection under neutral flags and like distinguishing marks, but also, while thus disguised, to attack German submarines by ramming. As a special inducement for merchantmen to destroy it also offered high prizes and his already paid such rewards.

"The Imperial government, in view of these facts, indubitably known to it, is unable to regard British merchantmen in the zone of naval operations, specified by the Admiralty staff of the German navy, as 'undefended.' German commanders, consequently are no longer able to observe the customary regulations of prize law, which they, before, have always followed.

"Finally, the Imperial government must point out, particularly, that the Lusitania on the last trip, as an early-erocasions, carried Canadian troops and war materials, including no less than 500 cases of ammunition, intended for the destruction of brave German soldiers who are fulfilling their duty with self-sacrifices and devotion in the Fatherland's service.

"The British shipping company must have been aware of the danger to which passengers aboard the Lusitania were exposed under such conditions. The company in overlooking them, notwithstanding the lives of American citizens as a protection for the ammunition aboard and acted against clear provisions in the American law, which repeatedly prohibit the forwarding of passengers on ships carrying ammunition and provides a penalty therefore. The company therefore, is wondrously guilty of the death of so many passengers.

"There can be no doubt, considering the definite report of the submarine commander, which further confirmed all other information, that the quick sinking of the Lusitania was primarily attributable to the explosion of the ammunition shipment raised by the torpedo. The Lusitania's passengers would, otherwise, in all human probability, have been saved.

"The Imperial government considers the above mentioned facts important enough to recommend them to the attentive examination of the American government.

"The Imperial government, while withholding its final decision on the demands advanced in connection with the sinking of the Lusitania until the receipt of the answer from the American government, feels impelled, in conclusion, to recall here and now, that it took cognizance, with satisfaction, of the mediatory proposals submitted by the United States government to Berlin and London as a basis for a modus vivendi for conducting maritime warfare between Germany and Great Britain. The Imperial government, by its readiness to enter upon a discussion of these proposals, thus demonstrated its good intentions in ample fashion.

"The realization of these proposals were defeated, as is well known, by the declinatory attitude of the British government.

"There the undersigned takes occasion, etc.
